

ADDANDI SRISAIRAJ

Hyderabad, Telangana, India | srisairajpateladdandi@gmail.com | 7670899095

Professional Summary

Computer Science graduate with strong experience in Python, Java, machine learning, and data processing. Skilled in building POCs, data-driven solutions, and AI-based applications using TensorFlow, Scikit-learn, Pandas, and AWS. Interested in GenAI, code automation, and modern application development.

Technical Skills

Programming Languages: Python, Java.

Data & Analytics: Matplotlib, Seaborn, EDA, Data Interpretation, Reporting, Business Insights, Excel, Power BI, Financial Data Compilation, Analysis, Metrics Management.

AI & Emerging Technologies: Claude, CLI Agents, OpenClaw, LLMs, MCPs, AI tools & technologies.

Automation: Workflow Automation, Flow Designer, Client Scripts, Business Rules, UI Policies.

Database: MySQL.

Web Technologies: HTML, CSS, JavaScript.

Tools: Visual Studio Code, Power BI, Git, MS Excel, Microsoft Office (Excel, Project, Outlook, PowerPoint), SAP System

Core Concepts: Data Structures & Algorithms, OOP, OS.

Core areas: Azure SQL, CI/CD, DevOps, or distributed systems

Cloud: AWS (S3, EC2, Lambda, RDS)

Work Experience

Cognifyz Technologies

Software Development Intern | Aug 2025 – Sep 2025

Improved Java console applications using conditionals, loops, methods, and OOP concepts through hands-on programming tasks. Built a Java CRUD task manager using ArrayList, classes, and file handling for persistent data storage.

Implemented Java utilities and web scraping programs to process user input, automate data extraction, and display the results.

Data Engineering Intern | Feb 2026 – Mar 2026

Processed and cleaned 50K+ railway records using Python, improving data accuracy by 30% using Python, handling missing values and standardizing station data. Performed data transformations and aggregations to analyze train operations and station-level traffic patterns. Built 10+ dashboards using Power BI, enabling faster decision-making to uncover trends in train schedules and operational performance.

Projects

Biometric Authentication using Dorsal Hand Veins

Developed a biometric authentication system achieving 92% accuracy using OpenCV and TensorFlow system leveraging vein pattern recognition. Utilized image processing (OpenCV, NumPy) for vein segmentation and feature extraction.

Designed and trained ML models (Scikit-learn, TensorFlow), significantly enhancing authentication reliability.

Automatic Detection of Student Engagement in Online Classes

Built an AI-powered engagement detection tool for platforms like Zoom and Microsoft Teams. Implemented real-time facial expression analysis using OpenCV and landmark detection. Delivered actionable analytics to educators, improving virtual teaching effectiveness.

Education

Bachelor of Technology in Computer Science and Engineering | 2025

CGPA: 7.89

Malla Reddy University, Hyderabad, Telangana, India

Certifications

- NPTEL – Programming in Java (Elite Grade, IIT Kharagpur 2023)
- The Complete SQL Bootcamp: Go from Zero to Hero (Udemy)
- The Complete Python Bootcamp from Zero to Hero in Python (Udemy)
